

Partrac Environmental Policy

Partrac works in waters and environmentally sensitive areas worldwide. Due to the nature of our business, we have a heightened awareness of the vulnerability of our environment. Consequently, we are pro-active in ensuring that Partrac, its sub-contractors and associates endeavour to minimise the environmental impacts of all business operations.

Our principles are to:-

- Conduct our activities to meet, or exceed, all applicable laws and regulations, as well as company policies and client environmental requirements.
- Continuously monitor equipment, facilities and operations to ensure compliance.
- Develop internal standards, typically in consultation with clients, to implement policies in situations where laws or regulations do not currently exist.
- Strive to prevent pollution at source. Avoiding releases of hazardous substances and ensuring that the means and training are in place to deal with accidental emissions.
- Managing waste: recycling where possible or disposing through safe and environmentally sound methods.
- Incorporate environmental considerations when planning procedural changes or new contracts, i.e. environmental impact from transport.
- Communicate policies to all employees, associates, sub-contractors and, equally, clients.

Partrac's Environmental Management System is certified to **BS EN ISO 14001:2004 Environmental Standard**.

A handwritten signature in black ink, appearing to read "A. Alton", is written over a horizontal line.
